PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience building full-stack web applications, REST APIs, databases, and deployment-ready systems. Skilled in frontend and backend development, database design, and application architecture. Seeking software engineering internships and junior developer opportunities to contribute to real-world products and grow my skills.

SKILLS:

Languages: Python, TypeScript, JavaScript, Java, SQL

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express, Spring Boot, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Prisma

Mobile & Cloud: React Native, Firebase, Docker

Cloud & Deployment: GCP, DigitalOcean, Hostinger

Tools: Git, GitHub, QGIS

Additional: AI API Integration, RAG Exploration

EDUCATION:

MAE FAH LUANG UNIVERSITY

BACHELOR OF ENGINEERING

PROGRAMME IN SOFTWARE ENGINEERING

|CHIANG RAI, THAILAND

August 2024 - Present

EXPERIENCE:

FULL-STACK DEVELOPER - AHNYAR HOUSE RESTAURANT ORDERING SYSTEM

React, TypeScript, Express, Prisma, PostgreSQL, DigitalOcean

- Developed a full-stack restaurant system for QR ordering, order management, inventory, and receipts.
- Built the frontend with React/TypeScript and REST APIs with Express, Prisma, and PostgreSQL.
- Prepared validation, environment configuration, and deployment architecture for DigitalOcean.

SELECTED PROJECT:

LEARNHUB - E-LEARNING MANAGEMENT SYSTEM

React, Java, Spring Boot, MySQL, Docker

- Collaborated on a university e-learning platform for courses, assessments, progress tracking, and certificates.
- Contributed to Spring Boot backend development, database design, and frontend integration.
- Designed role-based workflows and used Docker for consistent development environments.
